Memory: 1 GB RAM

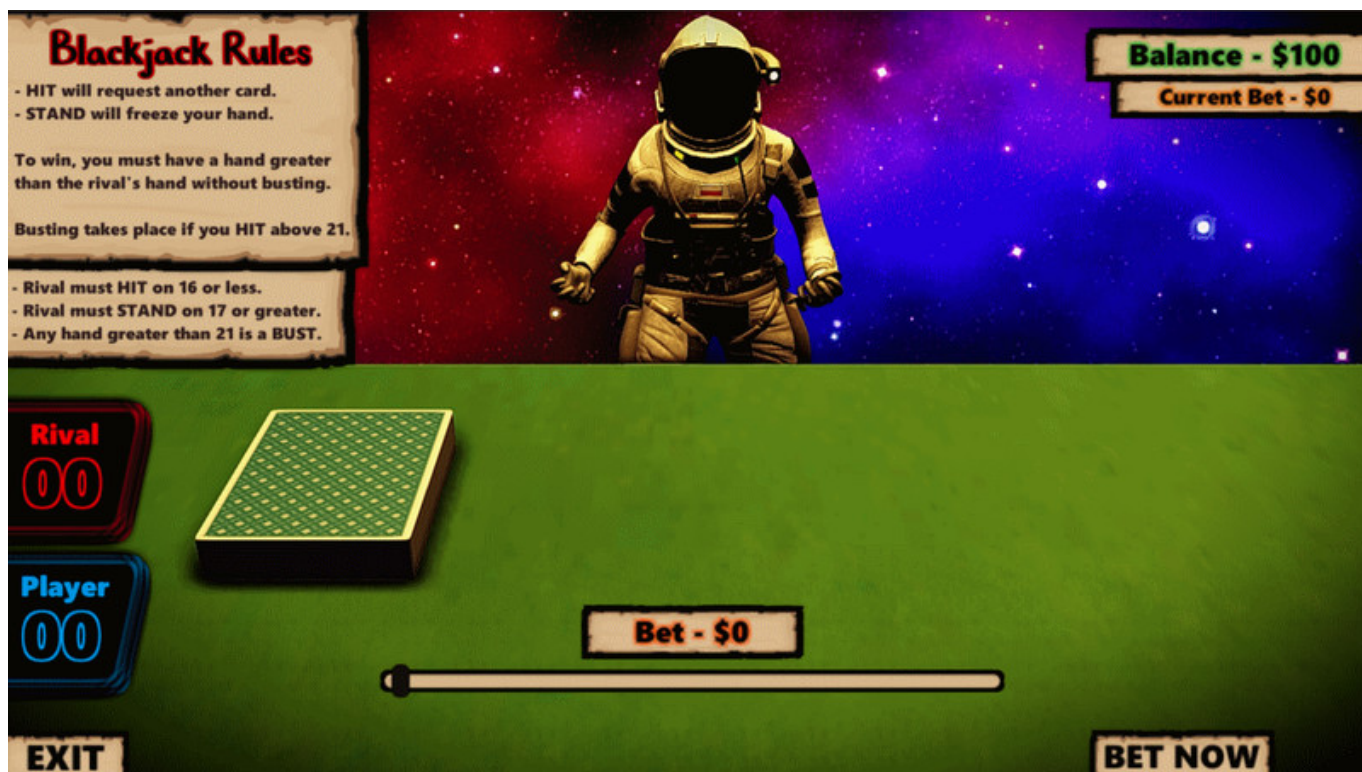

Graphics: Integrated Graphics

DirectX: Version 9.0

Storage: 1 GB available space

Sound Card: Integrated Audio

English

Doesn't let me split or double down so I guess it's not even technically blackjack? Due to the low price I won't complain about the slow pacing, the betting system, or the complete lack of changeable settings or options. However, I cannot recommend this game even as a casual blackjack game because it lacks the most basic blackjack rules like splitting or doubling down..

JDRumble gambling games are bad. Poorly coded/optimised, lacking the full betting options of their real-life counterparts, stay away!. not really worth it even if its for 50 cents you get bored after the first 5 minutes
